

Release Notes

Sage 100 2013 Product Update 9 (5.00.9.0)

The following is a list of enhancements and corrections that have been incorporated for Sage 100 2013 in this Product Update. Product Updates are cumulative, comprised of all program corrections found in prior updates. Smart Update will install only the programs that need to be updated since your last Product Update Installation. **If you choose to install this Product Update on a system that already has Product Update 9 installed, all programs released in Product Updates 1 through 9 will be reinstalled.**

This Product Update also contains program corrections introduced in 4.50.5.0 through 4.50.8.0, included in this report for reference.

Sage 100 Advanced and Premium Workstation Synchronization now updates the client workstation automatically. This replaces the need to run WKsUpdate.exe after installing a product update. Users running Sage 100 Standard over a network will still need to run WKsUpdate Standard.exe on each workstation. This program is located in the ..\mas90\wksetup directory on the Sage 100 Standard Server.

A 64-bit ODBC Driver Installer for Sage 100 2013 can be found in the ..\mas90\wksetup directory on the Sage 100 2013 Server. Run the SageODBC64Installer.exe from each Sage 100 Workstation where 64 bit access is desired.

All Sage 100 2013 Product Updates will require the installation to be from the Sage 100 Server. Significant enhancements have been introduced in Sage 100 2013 and its Updates. These include: Smart Update, Workstation Synchronization and Sage Auto Update. Part of these enhancements requires the Product Update to make changes to the local registry, necessitating a server side installation.

This Product Update can be installed from the Sage 100 2013 Server either physically at the console or by connecting to it through Remote Desktop.

Accounts Payable

Also Released in 4.50.8.0

- 1 For 2014, Box 10 Market Discount and Box 11 Bond Premium have been added for 1099-INT.

DE 99206 KBID 9000225

- 29 "The Check Sequence number is required" no longer appears after entering the Check Number in A/P Payment History Inquiry.
DE 100567 KBID 9000549

Accounts Receivable

Also Released in 4.50.8.0

- 1 Temporary Customer data is no longer incorrectly removed from AR_Customer.M4T when period end is processed.
DE 102100 KBID 28027

Previously Released in Sage 100 2013 Product Update 8 (5.00.8.0)

- 2 The Commission Edit Register no longer displays Commission Payable for National Accounts Sold To customer on unpaid invoice when the option, Commission Paid on Paid Invoice Only, is selected.
DE 103483 KBID 46490

3 AR Statement printing no longer ignores settings when National Account settings are used.
DE 103351 KBID 43364

Previously Released In Sage 100 2013 Product Update 7 (5.00.7.0)

4 Customer Item Pricing no longer displays the wrong customer records when using the arrow buttons.
DE 102999 KBID 36366

Previously Released in Sage 100 2013 Product Update 6 (5.00.6.0)

5 Credit Card Processing has been enhanced to include Level III Credit Card Processing.
DE 102873

Previously Released in Sage 100 2013 Product Update 5 (5.00.5.0)

6 "The payment type is required" in AR Invoice Data Entry when billing customer for invalid job number has been replaced with the correct message.
DE 102476 KBID 26972

7 Cursor no longer defaults to Header tab instead of InvoiceNo field on the Account Receivable Data Entry screen when batch processing is disabled.
DE 102217

8 Temporary Customer with payment history is removed from AR_Customer.M4T when period end is processed and the option is set to retain.
DE 102406

9 "Data is not selected for report printing" message for A/R Monthly Sales Report, if UDF value criteria is entered for the Selections grid in Sage 100 ERP 2013 has been corrected.
DE 102412

10 Delete and Change Customers no longer changes the customer number for additional invoices within AR Invoice History Inquiry instead of just the customer selected during the utility.
DE 102527

11 Sales Commission based on Paid Invoices for National Accounts Customers are purged from the Salesperson Commission Report during Salesperson Commission Purge while the invoice is unpaid has been fixed.
DE 102630

12 Salesperson is not in division ## message no longer displays when adjusting an invoice where AR does not use commissions.
DE 102538 KBID 26966

Previously Released in Sage 100 2013 Product Update 4 (5.00.4.0)

13 Tab stops at the header instead of going to Check No in AR Cash Receipts has been fixed
DE 101836

Previously Released in Sage 100 2013 Product Update 3 (5.00.3.0)

DE 102172
- 3 Single Level Bill of Materials Report no longer has the wrong description for Option line items when lines are deleted from the main bill.
DE 102221
- 4 The BM_InvalidBill_utl now corrects the ComponentRevision* in all records in v2013.
DE 102231
- 5 The Total Quantity on Picking Sheets in Bill of Materials is now correct if a scrap percentage is used
DE 102305 KBID 26612

Also Released in 4.50.6.0

- 6 Bill Disassembly Entry for Purchased Items, now updates inventory cost detail correctly.
DE 101250 KBID 9000839
- 7 Costed Bill of Materials - Extended Cost now Calculates for Sub Bill within Option Bill.
DE 101230 KBID 9000819
- 8 To prevent the Bill of Material Gross Requirements Report from containing entries selected from the same report, ran on another workstation, an "in use" message has been added.
DE 101095 KBID 9000744
- 9 Costed Bill of Materials Report Selected Bill option "round extended quantity for Integer Unit of Measure" now rounds the sub-bill correctly.
DE 101080 KBID 9000390
- Also Released in 4.50.5.0**
- 10 The Quantity Issued and Ending Qty totals are now correct on the History tab in Item Maintenance if a Disassembly Entry was updated with Disassemble Type of "Purchased Item" is used.
DE 100842 KBID 9000664
- 11 Bill of Materials Production Register now prints correct serial numbers when serial numbers are reused.
DE 100912 KBID 9000515
- 12 Indented Where-Used report now matches the Indented Where-Used Inquiry,
DE 99534 KBID 9000314
- 13 Costed Bill of Materials Report now correctly calculates the Unit Cost and Cost of Bill when a sub-bill has components with a quantity per bill less than 1.
DE 100194 KBID 9000390
- 14 CostCalc values are no longer stranded after updating Disassembly Entry in Bill of Materials if "Purchased Item" is selected as the Disassembly Type.
DE 100840 KBID 9000663
- 15 Error 2 BM_CostedMaterialsReport_rpt.pvc 654 printing for Specific Bills with multiple bills listed, has been fixed
DE 100974 KBID 9000683
- 16 The Description for a Component Item Code is now correct on the Gross Requirements Report if a Phantom bill contains the same Component Item Code that is on the Bill.
DE 100056 KBID 9000344

Bank Reconciliation

Previously Released in Sage 100 2013 Product Update 8 (5.00.8.0)

- 1 The Batch Number field on the Positive Pay Export Processing window is now enabled when Next Batch Number is defined in the Positive Pay Export Wizard.
DE 103184 KBID 39907

Previously Released in Sage 100 2013 Product Update 5 (5.00.5.0)

- 2 "The following checks are no longer in the Accounts Payable Transaction Payment History file", no longer occurs after clearing checks in Reconcile Bank.
DE 102165

Also Released in 4.50.6.0

- 3 Entries missing from Bank Reconciliation has been corrected.
DE 99232 KBID 9000196

Common Item

Previously Released in Sage 100 2013 Product Update 6 (5.00.6.0)

- 1 Error "CI_SageExchange 000000:000 – Error #26 Variable type Invalid" no longer occurs when trying to un-encrypt invalid credit card data during the conversion process.
DE 102983

Previously Released in Sage 100 2013 Product Update 2 (5.00.2.0)

- 2 The symbols fields and preview buttons have been removed from bank code maintenance. The information here was misleading, giving users the impression that nothing else needed to be done to the reports to get MICR fields to print. Users still need to go to every crystal report and add the MICR field and select the correct font in order for the MICR information to print. Users should then print a sample of every report to make sure everything prints correctly. The preview in bank code maintenance was also misleading that the font chosen here would print correctly in Crystal since it displayed properly. But adobe fonts that were not compatible with Crystal and which would not print, would display correctly in Bank Code Maintenance.
DE 101292 KBID 9000856

Customizer

Previously Released in Sage 100 2013 Product Update 8 (5.00.8.0)

- 1 An Error 88 SY_Maint.pvc 3042 no longer occurs when navigating records on screens that contain Customizer Scripts.
DE103013
DE 103013
- 2 Error 27 CM_MAINTHDR 0409 no longer occurs upon clicking "OK" to change the Height value of the Purchase Order Entry panel DMAINW in Sage 100 ERP.
DE 103139 KBID 39034

Previously Released In Sage 100 2013 Product Update 7 (5.00.7.0)

- 3 Unable to access User Defined Tab in AR Invoice data entry if Credit Card Processing is disabled has been corrected.
DE 103019 KBID 36894

Previously Released in Sage 100 2013 Product Update 5 (5.00.5.0)

- 4 Unable to hide Vendor Name field on Item Vendor Maintenance grid panel using Custom Office in Sage 100 ERP has been fixed
DE 101949

Previously Released in Sage 100 2013 Product Update 4 (5.00.4.0)

- 5 Work Order Entry Custom Panels (tabs) are no longer missing after migration to Sage 100 ERP 4.50 from a lower version such as 4.30.
DE 101684
- 6 UDF data now flows from SO Detail to PO Detail when creating PO from Auto Generate Orders Selection when "Summarize Drop Ship Lines by Vendor" is checked, for non-summarized lines.
DE 101926 KBID 9000808

Also Released in 4.50.5.0

- 7 UDFs posted to G/L are no longer all for the same receipt when posting to General Ledger in Detail, when P/O Receipt & Receipt/Invoice Variance for multiple receipts is updated. Note that while posting in detail, some GL postings are still summarized by comment, so the first UDF encountered may still be the UDF used.
DE 98702 KBID 9000609

Crystal Reports

Previously Released in Sage 100 2013 Product Update 2 (5.00.2.0)

- 1 Crystal Reports printing and paperless journal generation performance have been improved in Sage 100 ERP 2013.
DE 101342 KBID 9000895

CRM

Previously Released in Sage 100 2013 Product Update 8 (5.00.8.0)

- 1 The "Confirm To" person is now properly assigned when entering orders or quotes through Sage CRM.
DE 102917
- 2 Previously used opportunities are no longer being re-used when creating a new order or quote for the same company in Sage CRM.
DE 102919

Previously Released in Sage 100 2013 Product Update 5 (5.00.5.0)

- 3 The error "The selected action cannot be performed until a pending synchronization with Sage CRM is completed" no longer occurs in Sage CRM when attempting to create a quote or order and no default person is assigned to that company
DE 102701

Also Released in 4.50.6.0

- 4 A Function Break has been added in CU_RelationShipWizard_UI.
DE 101100

Also Released in 4.50.5.0

- 5 Users can now unrelate a Customer from CRM in customer maintenance even when the check box is available and Sales order invoice data entry is in progress.
DE 99372 KBID 90000216
- 6 Relationship Management Wizard performance has been improved.
DE 100548 KBID 9000640
- 7 Error message "Error executing SQL for table #PhoneLinkForMAS90: Query timeout expired" no longer occurs and performance improvements have been made when creating an order with on the fly opportunity in Customer CRM Data.
DE 100856 KBID 9000659
- 8 Canadian zip code is no longer blank when relating a new customer from Sage CRM to Sage 100 ERP.
DE 100808 KBID 9000624
- 9 PLink_ARDivisionNo and PLink_CustomerNo are now populated when relating a customer from CRM to Sage 100.
DE 100844 KBID 9000642

Business Insights

Also Released in 4.50.7.0

- 1 "Unable to print. Database Connector Error. [Database Vendor Code: 117]" when printing VendorInvoiceHistory report has been fixed
DE 101398 KBID 9000931

Also Released in 4.50.5.0

- 2 Phantom bills now show in the Bill of Materials Business Insights Explorer view.
DE 98789 KBID 9000015

General Ledger

Previously Released In Sage 100 2013 Product Update 7 (5.00.7.0)

- 1 General Ledger Allocations are now distributed as expected
DE 102773 KBID 31567

Previously Released in Sage 100 2013 Product Update 5 (5.00.5.0)

- 2 Error 14 SWQUERY 1414, occurs when clicking the flashlight in Custom Report Department Linkage has been corrected.
DE 102159
- 3 Performance improvements have been made to the General Ledger Change Account (GLCA) utility.
DE 102079
- Previously Released in Sage 100 2013 Product Update 4 (5.00.4.0)**
- 4 Error 60 SY_GridHandler.pvc 1268 drilling down to AP_InvoiceHistory, Tax Detail, from GL Transactions has been fixed
DE 101856
- Previously Released in Sage 100 2013 Product Update 3 (5.00.3.0)**
- 5 When printing the General Ledger Detail Report, if Print Condensed is selected the Print Comments field is no longer disabled and partial, full or no comments will print based on Print Comments selected.
DE 101396 KBID 9000907
- Also Released in 4.50.7.0**
- 6 Slow Financial Reports in 4.50 Premium versus 4.40 Standard has been improved.
DE 101231

Inventory Management

- Previously Released in Sage 100 2013 Product Update 8 (5.00.8.0)**
- 1 Variance Amount on the Physical Count Variance Register now equals the total of the line variance amounts when there is a Lot or Serial Item Code with no cost tiers.
DE 103687
- 2 IM_AliasItem Service Object no longer rounds numeric numbers to two decimal places.
DE 103443 KBID 29978
- Previously Released in Sage 100 2013 Product Update 7 (5.00.7.0)**
- 3 Decimal Precision has been corrected for IM_AliasItem User Defined Fields.
DE 102671 KBID 29978
- Previously Released in Sage 100 2013 Product Update 5 (5.00.5.0)**
- 4 The Database Connector Error: "Database Vendor code: 1012" no longer occurs when viewing the Inventory Detail Transaction Report.
DE 102160
- 5 Physical count update no longer creates a record with blank lot number for items with lot valuation method and quantity on hand and counted is zero
DE 102167
- 6 "The Physical Count Entry data entry files are in use", no longer occurs if item inquiry is open while printing the Physical Count Variance Register.
DE 102242
- 7 Changes have been made to the A/R Delete Change Customers Utility to improve processing time.
DE 100554 KBID 9000697
- Previously Released in Sage 100 2013 Product Update 4 (5.00.4.0)**
- 8 Inventory Sales History Report now displays the Ship To values in the correct section of the report.
DE 101666 KBID 9001064

9 Physical Count\Count Card Entry no longer adds to the On Hand Quantity when items have not been frozen.

DE 101625 KBID 9001050

Previously Released in Sage 100 2013 Product Update 3 (5.00.3.0)

10 Inventory Clear Lot Serial Quantities Committed has been changed to Recalculate rather than just clearing in Rebuild Sort Files

DE 100509

Also Released in 4.50.7.0

11 Allocated cost and Item cost fields are incorrect in Item Maintenance on the Cost Detail tab has been fixed

DE 101416 KBID 9000610

12 Incorrect item code populated during Alias Item setup when using TAB button has been fixed

DE 101461 KBID 9000944

13 In Item Maintenance on the History tab when the Compare PY button is selected the Variance Percent is now correct for Quantity Sold and Quantity Received

DE 101426 KBID 9000698

Also Released in 4.50.6.0

14 A program modification is included in this Product Update for the reported issue " Physical Count Entry appears to hang when loading approximately 30,000 Inventory Items." Please note that expected time to load approximate 30,000 items is 4 to 5 minutes. As an alternative, Use Card Count Entry as a solution instead. In most cases it is the preferable solution.

DE 101181 KBID 9000793

15 Physical count entry is now retained for active items that have inactive bills of material.

DE 101167 KBID 9000795

16 Items with ~ character in the item number can now be selected in reports.

DE 100108 KBID 9000381

17 Users are no longer able to do an inventory transfer of a serial number when that serial number already has a qty on hand in the target warehouse.

DE 101357 KBID 9000899

18 The message "A General Ledger account that was found is not on file" no longer occurs when updating the Inventory Transaction Journal.

DE 101029 KBID 9000710

Also Released in 4.50.5.0

19 The Inventory Trial Balance now shows a beginning balance when run for the last day of the period.

DE 99597 KBID 9000374

20 History tab Ending Balance now matches the Inventory Detail Transaction Report when Inventory is based on Calendar year and data exists for 2/29/2000

DE 100166 KBID 9000704

21 Issues with sales kit and drop ship sales history are now correct after conversion.

DE 100850

22 The message "" is Not on File in Sales Order entry no longer occurs when Inventory Items have a Primary Vendor that is blank.

DE 100378 KBID 9000434

- 23 The Inventory Sales History Report and Inventory Maintenance History Tab by Customer Sales, no longer display the Sales Amount and COGS as positive dollars for drop ship Credit Memos in 4.40 after converting from 4.20.
DE 97668 KBID 112597 Resolution ID 539604
- 24 A File/Busy-Error 0 no longer occurs during Physical Count Worksheet when attempting to freeze inventory items when there are invoices in S/O Invoice Entry and the invoice entry session is open. Instead, a Sage 100 ERP dialog will appear with the message "The IM Item Warehouse file is in use". This warning will appear because the I/M Item Warehouse file is in use elsewhere and the Print Worksheet and Freeze Items requires exclusive access to it. When this dialog appears, clicking OK will return the user to the Physical Count Worksheet report window so that freezing the inventory items can continue as other data entry sessions are closed.
DE 100931 KBID 9000961

e-Business Manager

Previously Released In Sage 100 2013 Product Update 7 (5.00.7.0)

- 1 An Error 88 IT_ShoppingCart_Upd.pvc 973 no longer occurs when updating the eBusiness Manager Shopping Cart Register.
DE 103110

Job Cost

Previously Released in Sage 100 2013 Product Update 8 (5.00.8.0)

- 1 Invoices with open balances now display in the "Apply to Invoice" lookup in Job Billing Data Entry.
DE 103094 KBID 38549

Previously Released in Sage 100 2013 Product Update 8 (5.00.8.0)

- 1 A calculated overtime rate will now print on the Certified Payroll Report when Print Standard or Calculated Wage Rate is set to "Standard" in TimeCard & TimeClock Options.
DE 103245 KBID 40824

Previously Released in Sage 100 2013 Product Update 3 (5.00.3.0)

- 2 In TimeCard Entry and Edit the Workers' Comp Code is no longer removed from the Overtime Entry when overtime entry is auto created.
DE 101559 KBID 9001018

Also Released in 4.50.7.0

- 3 In TimeCard Entry and Edit the Workers' Comp Code is no longer removed from the Overtime Entry when overtime entry is auto created.
DE 101553 KBID 9001018

- 4 Error 13, TCWDCH, 7225 no longer occurs in TimeCard Entry and Edit when calculating Overtime Begins How Many Hours per Week is set to 40.
DE 101518 KBID 9001003

Visual Integrator

Previously Released in Sage 100 2013 Product Update 8 (5.00.8.0)

- 1 Importing into AR_CashReceiptsDeposit no longer hangs when using Next Deposit number while Batch Entry is enabled.
DE 103146 KBID 38886

Previously Released in Sage 100 2013 Product Update 5 (5.00.5.0)

- 2 VI Import and Export Jobs ran through shortcuts or batch files will now cycle
DE 101982

Previously Released in Sage 100 2013 Product Update 4 (5.00.4.0)

- 3 Message "HS Record Invalid or Write Failed..." when importing out of balance Recurring Journal entries using Visual Integrator in Sage 100 ERP has been fixed.
DE 101875

- 4 Enhancement to allow importing credit cards directly into customer records has been completed.
DE 101980

Previously Released in Sage 100 2013 Product Update 3 (5.00.3.0)

- 5 Bill of Materials Kit Items now explode when importing into SO_InvoiceHeader and order line key is used.
DE 98409 KBID 112963 Resolution ID 541973

Previously Released in Sage 100 2013 Product Update 1 (5.00.1.0)

- 6 VI Perform Type is now working when set to Before Assign or After Assign.
DE 100892 KBID 9000726

Also Released in 4.50.7.0

- 7 From Visual Integrator Workers' Comp Codes containing special characters now import correctly into Payroll Data Entry.
DE 101391 KBID 9001011

Also Released in 4.50.6.0

- 8 Error when importing into AP invoice Error 27 Vlxxxx 554 no longer occurs.
DE 101052 KBID 111661 Resolution ID 533952

Also Released in 4.50.5.0

- 9 Performance improvements have been made when importing to CI_Item.
DE 96885 KBID 112188 Resolution ID 537271

- 10 Importing into JC.POSTCST now imports fields from JC.TYPE when using File Assign operation.
DE 100216 KBID 9000394

- 11 Next Batch Number now writes to Header record when using Replace pointed to an empty column
DE 99968 KBID 9000203
- 12 Users are now able to import Null or blank for reorder method when importing to IM_itemwarehouse.
DE 99376 KBID 9000217

Work Order Processing

Previously Released in Sage 100 2013 Product Update 8 (5.00.8.0)

- 1 The Quantity Committed is now cleared in IM_ItemCost when a Work Order Completion transaction with a Backflush Material issue transaction is deleted from data entry.
DE 103260 KBID 41154
- 2 Lot or serial numbers are now available to distribute in Work Order Transaction Material Issue.
DE 103537 KBID 47640

Previously Released In Sage 100 2013 Product Update 7 (5.00.7.0)

- 3 WO Cost Rollup and WO Inquiry no longer show different cost for Work orders with phantom sub-assemblies.
DE 102163

Previously Released in Sage 100 2013 Product Update 5 (5.00.5.0)

- 4 Work Order no longer uses the cost hierarchy when calculating the work order standard material costs, if a Standard Cost valued item has zero cost.
DE 101986
- 5 Work Order Cost Roll-up Register - when using the % of cost method to calculate overhead, Cost Roll-up incorrectly uses the % of cost from the previous step has been fixed.
DE 101746

Previously Released in Sage 100 2013 Product Update 4 (5.00.4.0)

- 6 Work Order Inquiry Error 81 WOWIAB 2012 has been fixed.
DE 101918

Previously Released in Sage 100 2013 Product Update 1 (5.00.1.0)

- 7 WOUxxx W/O Transaction Entry Lot/Serial Tier Distribution File is now cleared when a single batch is updated for Lot and Serial items.
DE 100735 KBID 9000626

Also Released in 4.50.7.0

- 8 Work Order Cost Roll-up Register does not update the Labor and Overhead Cost if bill contains duplicate line items has been fixed
DE 101418 KBID 9000920

Also Released in 4.50.6.0

- 9 A Negative material issue to the original material step, now correctly increments Quantity Required for Work Order.
DE 101176 KBID 9000771

- 10 The Work Order Transaction Register no longer updates the incorrect Serial Number to inventory if the number entered on completion already exists - a message will now display when the starting serial number already exists and has a quantity on hand.
DE 100733 KBID 9000607

Also Released in 4.50.5.0

- 11 Auto Issue Material Shortage Report sorted by Work Order, no longer overlaps the Description field into the Unit of Measure Field.
DE 99417 KBID 9000270

- 12 Work order material costs incorrect when the cost completion method was Planned, has been corrected
DE 100480
- 13 Work Order Material Issue Lot/Serial Distribution Quantity Available Unit of Measure Conversion has been corrected.
DE 100687 KBID 9000583
- 14 An Intermittent DTR Out of Balance no longer occurs after work order material issue transactions are updated.
DE 99936 KBID 9000689
